SB-VespaGTS Installation

Before starting the installation please verify the operation of the brake lights.
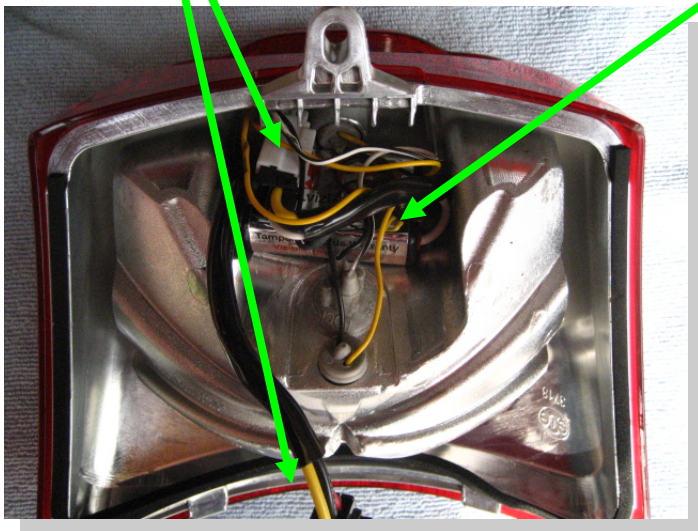

REAR of motorcycle

FRONT of motorcycle

STEP 1:
Remove the taillight assembly to expose the OEM connectors. Disconnect(open) this connector set.

STEP 2:
Plug the SB-VespaGTS flasher in series between the above connectors. (*The connectors are keyed such that installation can only be performed one way.*)

STEP 3:
Tuck and secure the SB-VespaGTS flasher inside the taillight assembly and secure with supplied tie-wraps as shown. Reinstall the taillight assembly. *(See Datasheet for more installation help).* Test for functionality. Ride it, and tell all your friends about us!
